info:

Gas assists cutting either in cutting speed, cutting thickness or cutting effect.

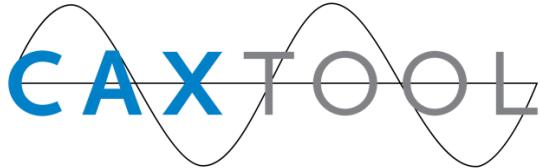

For example, oxygen helps to cut faster and thicker; nitrogen helps to get brighter cutting edge.

The solenoid valve controls the gas blowing. Gas blows only during cutting, which saves your gas cost. SMC proportional valve controls the gas pressure and brings good cutting all the time, for example, gas pressure is lowered when cutting corners.

- **Lemez behelyezése lézervédelmi burkolat esetén / Material Loading System (OPTION)**

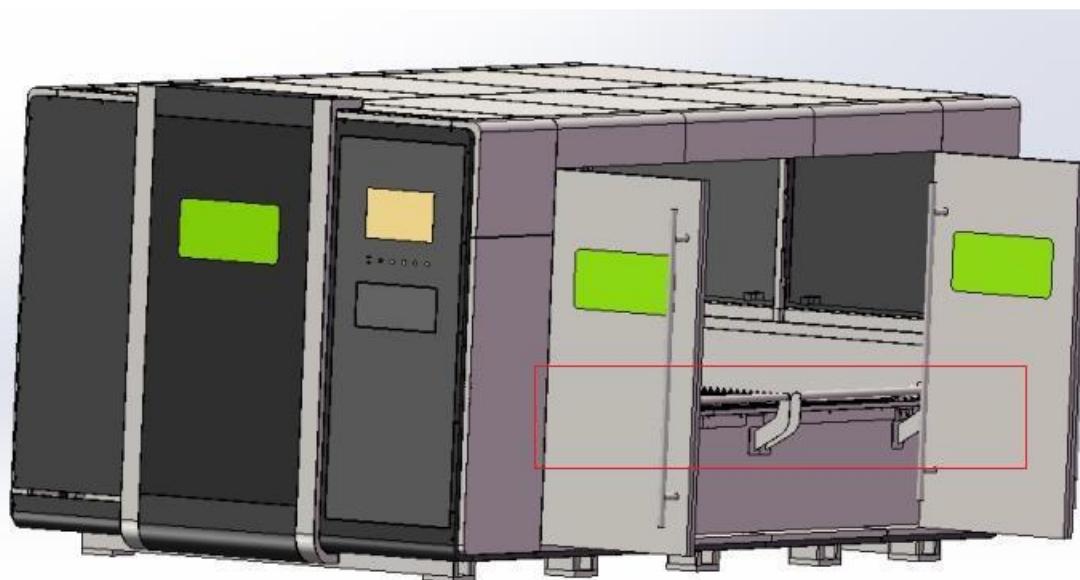

The machine has folding doors at right side, through which you can load the metal sheets to the machine table. For easier loading of metal sheet, we build themachine with nylon shaft besides the machine table. The shaft is higher than the machine table and Y-axis movement structure, so the metal sheet won't be blocked. Nylon shaft (instead of metal shaft) will not scratch the metal sheet.
